### Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces. We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

## H. C. Waters & Co. HARDWARE MERCHANTS.

How to heat the new House is one of the most important things to be considered.

Most people now-a-days, who build, want the heating plant in the basement. They want the heater always set up and out of the way. They want the litter made by wood, coal and ashes down cellar out of sight.

With a furnace you are able to heat any room in the house on short notice. The fire danger is less than with stoves. The floors are always warmer.

Not all furnace-heated houses are satisfactory. Some people let their job to the lowest bidder; the bidder realizing this, cuts here and there to reduce cost, so as to

have his price low enough to get the job.

Seldom does a job of this kind prove satisfactory to the owner. It means extra expense fixing over, and in many instances, a new plant.

Building over a heating plant is quite similar to building over an old house.

We are selling the Round Oak furnace and just catering to those house owners and builders who want the best, and are willing to pay what a good job is worth.

It isn't what you pay that constitutes the true bargain—it's what you get.

We install all Round Oaks on plans furnished by Beckwith, and they guarantee results.

We are able this season to install the plant complete, on short notice, and finish it before leaving the job.

Be honest with your own pocket-book. Go carefully into the merits and reputation of the Round Oak furnace. A Round Oak, properly installed in your house, will prove a satisfactory heating plant for 25 or 30 years at least.
